Disclaimer

Forward-looking statements included in this presentation are prepared based on our expectations and projections in light of the information currently available to us, which involve various risks and uncertainties (including, but not limited to, economic trends, market demand and the highly competitive semiconductor industry). Such risks and uncertainties may cause our actual results to be materially different from any future results expressed or implied by these forward-looking statements. We undertake no obligation to update any forward-looking statements included herein.

The information and projections regarding the flash memory industry included in this presentation are our assumptions and projections derived from information currently available to us. Whilst this presentation is provided in good faith, it does not purport to be comprehensive and has not been independently verified. We make no representations with respect to such information and projections.

This presentation includes Non-GAAP measures we use internally in making decisions. Non-GAAP measures exclude non-recurring items and other specific items from IFRS-based figures to more easily evaluate the Group's fundamental profitability. We believe that disclosing non-GAAP measures makes it easier for stakeholders to compare the Group's performance with that of other companies in the same industry and against previous fiscal years. Non-GAAP measures are used internally by us and are not accounting items based on IFRS, and have not been audited or reviewed by auditors. Therefore, such non-GAAP measures may not accurately reflect the Group's financial condition or operating results. "Non-recurring items" are temporary gains and losses that we consider should be excluded for non-GAAP measures, including the impact of purchase price allocation (PPA) arising from mergers and acquisitions, provisions for losses on litigation, and the impact of significant changes to tax policies. "Other specific items" are gains and losses that we consider difficult to compare with other companies due to factors such as different accounting standards, including costs for the fiscal year recorded under the Group's continuous service and performance-linked stock-based remuneration plans.

This presentation includes internal measures which our management relies upon in making decisions (the "Non-GAAP Financial Measures") that differ from financial measures prepared in accordance with International Financial Reporting Standards ("IFRS"). The Non-GAAP Financial Measures, which are IFRS measures plus adjustments made for non-recurring items, have not been audited or reviewed by auditors. Therefore, such Non-GAAP Financial Measures may not accurately reflect our financial condition or operating results.

This presentation was prepared to provide information on our consolidated financial results for the first quarter of fiscal year ending March 31, 2027 and does not constitute, or form a part of, any offer or solicitation to purchase or subscribe for securities in any jurisdiction.

Today's Agenda

1

- NAND Market Overview
- Enhancement of Production Capability to Support Growing Demand in the AI Era

2

- FY2026 Q1 Results
- Q2 Guidance

Overview of the NAND Market and Enhancement of Our Production Capability

NAND Market Outlook

NAND market growth continues to be fueled by AI-driven demand in DC/Enterprise

DC/Enterprise

- ✓ **Agentic AI applications** are emerging as a primary growth catalyst
- ✓ Traditional server NAND demand is also benefiting from the growing adoption of agentic AI applications

Smartphone/PC

- ✓ **Smartphones**
 - Units: down for low-priced models, flat for high-priced models
 - NAND demand: flat vs. CY25
- ✓ **PCs**
 - Units: down on higher BOM costs
 - NAND demand: slight decline vs. CY25

NAND Market Outlook

- ✓ **CY26:** Bit growth rate in high-teens %

Expecting Kioxia's CY26 shipment bit growth to be in line with market outlook

- ✓ **CY27:** Demand anticipated to exceed supply.

KIOXIA

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 5

First, let me talk about the current state of the NAND market.

Currently growth in AI demand is driving the NAND market, with data centers and enterprise applications leading the growth. Notably, agentic AI applications are a key growth driver for NAND demand, impacting even demand for traditional servers.

The smartphone market is seeing a decline in shipments of low-priced models, while high-end models are performing steadily. As a result, we anticipate smartphone NAND demand to remain flat compared to CY25. The increased storage capacity of high-end models is supporting demand.

The PC market is expected to see a decrease in shipments due to rising BOM costs, leading to a slight decline in NAND demand compared to CY25.

In light of these market trends, we see AI-driven data center and enterprise demand as sustaining market growth, and we believe that the NAND market will continue to grow.

For CY26, in terms of bit growth we currently anticipate the NAND market to grow in the high teens percentage range, in line with how we see our own bit growth for the year.

Looking ahead to CY27, we forecast that demand will exceed supply. We will continue to closely monitor market trends and respond appropriately to demand.

Enhancement of Production Capability to Support Growing Demand in the AI Era

Ongoing Expansion of Manufacturing Infrastructure for AI Demand

Improved Productivity
Through AI

Drive Migration
Through Investment

JV Partnership

Multi-site Production
System

Yokkaichi Plant

A Key Site Combining Leading Edge R&D
and Manufacturing Capabilities

Kitakami Plant

Producing BiCS FLASH™ Generation 10

KIOXIA

We are continuously improving productivity by leveraging big data and AI technologies. Through continuous capital investments, we are transitioning to next-generation products to strengthen our competitiveness. Additionally, our long-term JV partnership with Sandisk allows us to leverage economies of scale through ongoing joint development and co-investment.

We have a multi-site production system comprising two locations, our Yokkaichi Plant and the Kitakami Plant, which addresses the increasing demand for NAND and allows us to achieve stable supply. Both plants excel in terms of business continuity planning.

The Yokkaichi Plant is one of the world's largest flash memory manufacturing bases and serves as a key site equipped with leading edge R&D. It enables smooth transitions from product development to mass production, and close collaboration between development and manufacturing departments facilitates efficient launches while leveraging advanced technologies and know-how. It also houses advanced R&D space for developing next-generation memory, playing a crucial role in future technological innovations.

The K2 fab at our Kitakami Plant began operation in September 2025 and began production of the 10th generation BiCS FLASH™ this year. With the introduction of the latest equipment, the plant achieves high productivity and contributes to further improvements to yield and productivity for products developed and mass-produced at Yokkaichi. It also boasts excellent site expandability, positioning it as a key manufacturing base supporting future demand growth.

Through the AI-powered productivity improvements, technology node migration facilitated by continuous capital expenditures, JV partnership, and multi-site production system, we are steadily expanding our production base to support long-term demand growth.

To continue addressing demand growth and investing in next-generation technologies, we plan to spend an average of 470 billion yen annually on capital expenditures from FY26 to FY28.

FY2026 Q1 Results and
FY2026 Q2 Guidance

Financial Highlights (Three Months Ended June 30, 2026)

Quarterly

Revenue

Record High
QoQ x1.8

1,767.1 Bn Yen

Including 59.1Bn yen
for JV-related sales

Adjusted Non-GAAP Gross Profit¹

Record High
QoQ x2.1

1,405.5 Bn Yen

Margin 80%

Margin 82%²

After excluding JV-related items

Non-GAAP Operating Profit¹

Record High
QoQ x2.2

1,326.2 Bn Yen

Margin 75%

Core FCF (Operating Cash Flow – Net CAPEX³)

Record High
QoQ x3.4

827.2 Bn Yen

Net Cash⁴

Achieved a Net
Cash Position

186.7 Bn Yen

KIOXIA

1. For a reconciliation of Non-GAAP items, please refer to pages 26, 27, 28 and 29 of this presentation

2. Excludes the revenue and cost of goods sold related to the JV. For JV-related information, please see page 10 of this presentation
Gross Margin after JV-related adjustments = (Revenue (excluding JV-related items)) / Adjusted Non-GAAP Cost of Revenue
(excluding R&D and JV-related items)) / Revenue (excluding JV-related items) × 100

3. Net CAPEX: Expenditures for PP&E and intangible assets, net of proceeds from sales of PP&E and others, and subsidies

4. Net Cash: Bonds and borrowings - Cash and cash equivalents

Foreign currency-denominated bonds are converted at the swap rate for those under a swap agreement

8

- Achieved record revenue and profit in Q1.
- Revenue increased by approximately 1.8 times QoQ.
- Adjusted Non-GAAP gross profit was 1.4055 trillion yen with a gross margin of 80%.
- Gross margin excluding JV-related items was 82%.
- Non-GAAP operating profit more than doubled QoQ at 1.3262 trillion yen, exceeding 1 trillion yen for the first time, with a margin of 75%.
- This quarter's profit surpassed the previous year's full-year total in just three months.
- Core free cash flow reached a record high of 827.2 billion yen.
- Core free cash flow: Operating cash flow minus net CAPEX.
- Achieved a net cash position by generating record high core free cash flow.
- All senior loans have been fully repaid.

Three Months Ended June 30, 2026 Results

Quarterly

Exceeded all guidance and surpassed record highs across all metrics.

QoQ revenue up ~1.8x; operating profit nearly doubled.

Bn Yen	Q4	Q1		
	Results	Guidance Announced on May 15	Results	
Revenue	1,002.9	1,750.0	1,767.1 QoQ +76.2%, YoY +415.5%	ASP⁴ (QoQ) Around 70% increase Like-for-Like and Blended ASPs broadly aligned
Non-GAAP Operating Profit	599.1 Margin 59.7%	1,300.0	1,326.2 Margin 75.0% QoQ +121.4%, YoY +2833.2%	
Non-GAAP Net Income ¹	409.9 Margin 40.9%	870.0	887.0 Margin 50.2% QoQ +116.4%, YoY +4692.5%

- Following Q4, significant increases in revenue and profit continued, with revenue approximately 1.8 times and operating profit more than doubling QoQ.
- ASP: Upward trend accelerated, blended ASPs and like-for-like ASPs increased by about 70% QoQ.
 - ✓ Significant increase across all applications.
- Bit Growth: Overall increase in low single-digit percentage QoQ, strongest growth in data center demand.
- Revenue: 1.7671 trillion yen, approximately 1.8 times QoQ and about 5 times YoY.
- Non-GAAP operating profit: 1.3262 trillion yen, over double QoQ and about 29 times YoY.
- Non-GAAP net income: 887 billion yen, over double QoQ and about 48 times YoY.
 - ✓ One-time cost of approximately 10 billion yen related to full repayment of senior loans, recorded under financial expenses.
- Currency exchange: Positive impact from 5 yen depreciation against the dollar.
- Vs Guidance
 - ✓ ASP exceeded expectations.
 - ✓ Some bit shipment deferred to Q2 due to delayed shipments.
 - ✓ Provision for employee benefits newly recorded, approximately 50 billion yen per year starting this quarter (recorded in COGS and SG&A).
- Accounting differences (recognized only under IFRS, not non-GAAP):
 - ✓ Stock-based remuneration expenses: 19.4 billion yen in SG&A due to a significant increase in stock price.
 - ✓ Provisions for losses on litigation: 36.6 billion yen in SG&A accordance with IFRS, related to the case disclosed on July 17.

- All application segments significantly surpassed previous record sales revenue
- **Smart Devices**
 - ✓ Increased by 56% QoQ to 525.7 billion yen, accounting for 30% of total revenue.
 - ✓ Sales prices significantly increased, breaking record sales revenue
- **SSD & Storage**
 - ✓ Approximately doubled QoQ to 1.1747 trillion yen, making up 66% of total revenue.
 - ✓ PC-related sales:
 - Revenue breakdown: slightly below 40%.
 - Despite a decrease in volume, sales increased QoQ mainly due to higher selling prices
 - ✓ Data Center & Enterprise:
 - Revenue breakdown: over 60%
 - Record d/e SSD shipments driven by strong AI server demand; higher ASPs contributed to record revenue growth
- The 8th generation BiCS FLASH™ production ratio grew to over 50% as of the end of June.

- Revenue doubled in SSD & Storage, increasing approximately 1.8 times overall.
- All applications achieved record-high revenue.

Cash Flow (Q1 Results)

Quarterly

Operating and core free cash flow reached record highs

Core FCF: 827.2 Bn Yen

(Bn Yen)

Operating cash flow

- Primarily driven by increase in selling prices and the increase in sales of d/e SSDs
- Expansion of 8th generation BiCS FLASH™ production
- Cash flow nearly tripled QoQ to a record high (Q4: 294.4 bn yen, Q1: 866.3 bn yen)

Investing cash flow

- Gross CAPEX³: 52.4 billion yen
- Investment in Nanya Technology Corporation: 78.2 billion yen
- Mainly for equipment for expanding the production of 8th and 10th generation BiCS FLASH™

Financial cash flow

- Full repayment of senior loans: 407.5 billion yen

KIOXIA

1. Investing cash flow: Capex of (52.4) billion yen + government grants of 12.0 billion yen + acquisition of other financial assets (78.2) billion yen + 1.3 billion yen in other items
 2. Effect of exchange rate changes on cash and cash equivalents
 3. Total capital investment excluding subsidies, etc.

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 12

- Operating Cash Flow
 - ✓ Increased sales prices and higher sales of data center & enterprise SSDs.
 - ✓ Expansion of 8th generation BiCS FLASH™ production
 - ✓ Resulted in a threefold increase in Operating Cash Flow QoQ (Q4: 294.4 billion yen, Q1: 866.3 billion yen).
 - ✓ Achieved record-high Operating Cash Flow after absorbing corporate tax payments of 100.5 billion yen
- Investing Cash Flow
 - ✓ CAPEX: 52.4 billion yen expenditure; subsidies: 12 billion yen income; other net income: 1.3 billion yen.
 - ✓ Investment in NANYA: 78.2 billion yen.
 - ✓ Mainly focused on manufacturing equipment for 8th generation/10th generation BiCS FLASH™.
- Core Free Cash Flow
 - ✓ Definition: Operating Cash Flow minus net CAPEX.
 - Net CAPEX accounts for business-related capital expenditures, subsidy income, and equipment sale proceeds.
 - Measure to show free cash flow stemming from actual business activities. We plan to use it going forward.
 - ✓ Achieved a record-high Core FCF of 827.2 billion yen in Q1 due to record operating CF and continued capital investments to capture growing NAND demand.
 - ✓ Core FCF excludes the 78.2 billion yen investment in NANYA.
- Financing Cash Flow
 - ✓ Fully repaid senior loans amounting to 407.5 billion yen, improving financial health.
- Use of Cash for Q2 (July-September)
 - ✓ Expected gross CAPEX of 88 billion yen for Q2.

Balance Sheet

Quarterly

Equity ratio surpassed 50% on strong profit generation

Assets

Liabilities and Equity

KIOXIA

1. Cost of Sales is based on Non-GAAP. From FY2025, year-end calculations are based on 90 days, same as the quarterly calculations. For the method of calculating Non-GAAP Cost of Sales, please refer to page 28 of this document.
2. Ratio of equity attributable to owners of parent

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 13

Assets

- ✓ Cash and cash equivalents
 - Cash and cash equivalents increased to 791 billion yen due to record-high core FCF.
 - This achievement comes after fully repaying senior loans.
- ✓ Inventories
 - Inventory balance was 438.1 billion yen, an increase of approximately 25.5 billion yen from the previous quarter-end.
 - Q1 Days of Inventory was 102 days. Even excluding strategic DRAM inventory built up in Q4, there was no significant change from Q4.
 - DRAM has been secured through CY2026.
- ✓ Other Assets
 - Book value increased by approximately 300 billion yen due to end-of-period market valuation of investments in securities like NANYA.
→The impact is recorded in Other Comprehensive Income (OCI), with no effect on profit and loss.

Liabilities

- ✓ Bonds and Borrowings decreased by 413 billion yen due to full repayment of senior loans.
 - End of FY2025: 1,047.6 billion yen → FY2026 Q1: 634.6 billion yen.
 - Considering currency swap valuation impact, the actual bond balance was approximately 30 billion yen lower than the book value.
- ✓ Other Liabilities
 - Primary increase was in accrued corporate taxes due to substantial profit growth.

Equity

- ✓ Due to record-high net profit, equity reached 2.4045 trillion yen.
- ✓ Equity ratio improved significantly from 38% at the end of FY2025 to 51% at the end of FY2026 Q1.

Enhancing Financial Structure: Timeline of Net Debt-to-Equity Ratio

Quarterly

Achieved a net cash position driven by record-high core free cash flow, providing a strong foundation for future investment and shareholder returns

KIOXIA

1. Net D/E ratio: (Bonds and borrowings - Cash and cash equivalents) / Total equity attributable to owners of parent
2. Foreign currency-denominated bonds are converted at the swap rate for those under a swap agreement
3. Total equity attributable to owners of parent

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 14

- Since listing, we have continuously reduced net interest-bearing debt.
- Achieved a net cash position as a result of generating record-high core FCF in Q1.
- Aiming to maximize FCF continuously:
Maintain liquidity for future CAPEX, R&D, and human capital investments.
Prioritize strengthening financial health.
Plan to allocate surplus cumulative FCF to further growth investments and shareholder returns.
- Utilize an appropriate level of bonds and loans to pursue healthy leverage and improved capital efficiency.

FY2026 Q2 Guidance (Three Month Ended September 30, 2026)
Quarterly

(Bn Yen)	FY2026	FY2026	
	Q1 Results	Q2 Guidance	QoQ
Revenue	1,767.1	2,390.0	+35.2%
Non-GAAP Operating Profit	1,326.2 Margin 75.0%	1,900.0 Margin 79.5%	+43.3%
Non-GAAP Profit Before Tax	1,291.5 Margin 73.1%	1,880.0 Margin 78.7%	+45.6%
Non-GAAP Net Income¹	887.0 Margin 50.2%	1,280.0 Margin 53.6%	+44.3%
Non-GAAP Earnings Per Share (Yen)²	1,621.81	2,335.70	+713.89
Exchange Rate (Yen) USD / JPY	160	162	FX Sensitivity ³ (quarterly) - Revenue: 14.0 Bn Yen - Operating Profit: 13.0 Bn Yen

KIOXIA
1. Non-GAAP profit attributable to owners of parent
2. Non-GAAP basic earnings per share (before stock split)
3. Quarterly impact of a 1 yen fluctuation in the exchange rate against the U.S. dollar. It cannot be directly compared with other quarters since this is based on the assumed sales volume for Q2. Exchange rate for July has been fixed; the August - September rates have not yet been fixed.
© 2026 KIOXIA Holdings Corporation. All Rights Reserved.
15

- Starting this quarter, we are also disclosing guidance for profit before tax.
 - ✓ We aim to improve our level of disclosure and deepen communication with stakeholders.
- Guidance: Revenue of 2.39 trillion yen, Non-GAAP operating profit of 1.9 trillion yen, OP margin of approximately 80%.
 - ✓ Expect record highs in all metrics.
 - ✓ Non-GAAP operating profit is expected to exceed the previous record high in Q1 by approximately 600 billion yen, approaching 2 trillion yen.
- Both sales prices and bit shipment are expected to increase from the previous quarter.
- Planned R&D investments in:
 - ✓ Next-generation products such as 10th generation/11th generation BiCS FLASH™.
 - ✓ SSDs for inference AI.

→R&D expenses are expected to increase from Q1, anticipating a total of 200 billion yen for the full year.
- Currency exchange rate: Assuming 162 JPY/USD.
- Exchange rate sensitivity: A 1 yen movement against the dollar is estimated to impact quarterly revenue by 14 billion yen and operating profit by 13 billion yen.

→This estimate is based on Q2's expected sales volume and cannot be directly compared to other quarters. Note that the exchange rate for July is fixed, while rates for August and September remain uncertain.

Continued value creation driven by our strategic priorities

1

Stock Split

- Purpose: To create a more attractive investment environment and expand our investor base
- Split Ratio: the Company's common stock will be split at a ratio of 3 to 1
- Record Date: September 30, 2026
- Effective Date: October 1, 2026

2

Share Buyback

- Purpose: To improve its shareholder returns and capital efficiency
- Total number of shares to be acquired: 30 million shares (maximum) (5.5% of total shares outstanding, excluding treasury shares)
- Total amount of acquisition: 800.0 billion yen (maximum)
- Acquisition Period: August 3, 2026 to October 30, 2026
- Intended acquisition method: Market purchases on the Tokyo Stock Exchange pursuant to a discretionary trading agreement

KIOXIA

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 16

- Stock Split
 - Purpose: To create a more attractive investment environment and expand our investor base
 - Split Ratio: 3 shares for each share of the Company's common stock
 - Record Date: September 30, 2026
 - Effective Date: October 1, 2026
- Share Buyback
 - Purpose: To improve its shareholder returns and capital efficiency
 - Maximum Number of Shares to Be Acquired: 30 million shares (5.5% of total shares outstanding, excluding treasury shares)
 - Maximum Aggregate Acquisition Amount: ¥800.0 billion
 - Acquisition Period: August 3, 2026 to October 30, 2026
 - Intended acquisition method: Market purchases on the Tokyo Stock Exchange pursuant to a discretionary trading agreement

Key Takeaways

1

Accelerated growth driven by AI demand

- ✓ Q1 delivered record sales revenue and operating profit, with the trend continued into Q2
- ✓ The widespread adoption of agentic AI is fueling robust NAND demand growth – still in its early stages
- ✓ We are on track toward our 50% LTA volume coverage for CY28 with key customers, providing long-term revenue visibility and ensuring deep engagement with high-value customer segments
- ✓ Continuously advancing and expanding our manufacturing infrastructure to capture expanding AI demand

2

Financial strength enabling future growth investments

- ✓ Achieved record core free cash flow
- ✓ Achieved a net cash position, materially improved our financial flexibility

3

Continued value creation driven by our strategic priorities

- ✓ Evaluating a range of initiatives across growth investment, capital efficiency, shareholder returns and others
- ✓ Stock split (split ratio: 1:3, record date: September 30, 2026, effective date: October 1, 2026)
- ✓ Share buyback: 30 million shares (Maximum), 800.0 billion yen (Maximum), Period: From August 3, 2026 to October 30, 2026

KIOXIA

KIOXIA
 1. The revenue growth rate is QoQ for quarterly figures and YoY for annual figures
 2. Gains/losses on foreign exchange and derivatives are reported based on the net amount for each period in "finance income" and "finance costs"
 3. Expenditures for property, plant and equipment (PP&E) and intangible assets
 4. Expenditures for PP&E and intangible assets, net of proceeds from sales of PP&E and others, and subsidies

KIOXIA

1. Cost of Sales is based on Non-GAAP. From FY25Q4, year-end calculations is based on 90 days, same as the quarterly calculations. For the method of calculating Non-GAAP Cost of Sales, please refer to page 28 of this document.
2. Foreign currency-denominated bonds are converted at the swap rate for those under a swap agreement
3. Net D/E ratio: (Bonds and borrowings - Cash and cash equivalents) / Total equity attributable to owners of parent
